Hi Susan –

Do you still need the 2008 RCRA Groundwater Monitoring Report? I can burn a disc for you and send it.

Susan, Kelly and Kevin,

I just went to the FMC most recent RCRA GW monitoring report and found that Fred Ordway performs data validation for all of the Elemental Phosphorus data. I believe and I know that Hydrometrics has been collecting the water samples for both the RCRA and CERCLA GW monitoring programs since January 2008 and some dates before that time period. I can have Carla Fisher forward the most recent information reports to you or she can response to you based on this email. The two monitoring wells where we have detections of elemental phosphorus are MW-108 and 122. I have included some trend plots on these two wells from the Current Conditions (2008) report by FMC. Let me know if you have any additional questions and sorry for my earlier email.

Are either of you familiar with the following report:

Technical Data Review Report 20-21 May 2008 Groundwater Sampling Elemental Phosphorous by  
Ordway and Associates June 9, 2008

I believe Fred Ordway is/was a consultant to FMC. If so, could you please forward a copy?

Susan Hanson
